Dear GHD Recruitment Team,

I believe that my innate passion in problem solving and continuous learning in advisory, combined with my skills in teamwork and communication, will not only allow me to bring value to GHD, but also gain invaluable experience in return.

GHD's ability to create an innovative and collaborative environment that also holds high regards to their integrity are just some of the factors that attract me. This combined with their commitment to sustainable solutions and vigilance towards clients, are just some of the values that deeply resonate with my own beliefs. A role in the Transaction, Strategy, and Commercial team would suit my interests accurately, as I am able to utilise my valuation knowledge and financial modelling experience, I have acquired throughout my Finance major and extracurricular involvement in the University of Technology Sydney Equity Research Competition. I believe a role in the Transaction, Strategy, and Commercial team will provide me with a comprehensive experience in a field I wish to pursue.

In addition to maintaining a consistent performance across my Finance and Mechatronics Engineering subjects, both my work and extracurricular experience has assisted in the development of my analytical skills. This has been reinforced as a Student Financial Analyst in the UTS Equity Research competition where I have been able to hone my communication and teamwork skills, whilst providing valuation models of firms in the mining industry and presenting to external mentors in the Investment Management industry. Additionally, my experience as a Product Development Engineer Intern at Sonder Design has enhanced my ability to manage the demands of stakeholders and consumers whilst producing Computer Aided Design (CAD) models, documenting design changes, liaising with Sonder's executive team and the manufacturer Foxconn. Ultimately, I was able to create profitable e-ink keyboard designs which brought value to Sonder Design. My success in the role is attributed to my ability to work effectively in a team and have a close attention to detail.

A role in GHD would not only allow me to meet my short-term goals of personal development, but also help utilise my analytical and problem-solving skills to their maximum ability. Due to my core values aligning with that of GHD, I will be able to offer a meaningful impact in return.

I thank you for your time and consideration and look forward to discussing this position with you soon.

Yours sincerely,

Marko Majetic
